Kreem Blue Shield

Blue Shield is an internal exhaust pipe sealant that is designed to prevent 'pipe blueing' on properly tuned motors. Since blueing is caused by excessive heat, it may still occur if an engine is not in proper tune or if the carburetor is jetted too lean. Slight blueing may occur on pipes with extremely sharp bends coming from heads. Install on new, clean pipes only.

Cycle Shack 2" Dresser Duallies for Touring Models 2009-on

Tru dual, 2-into-1 separate head pipes replace the OE 2-1 header on 2009-on FLH, FLHR, FLT, FLHX models to help relieve excess heat under the riders right leg. Full 2" O.D. stepped head pipes provide increased flow and performance on mototrs over 100 c.i. Reuses OE heat shields on head pipes and is supplied with lower heat shield and left side crossover heat shield. Should be used with MHD-484, MHD-320 or MHD-324 series Cycle Shack mufflers with 2" O.D. baffles.

Exhaust Hardware

Exhaust Port Fasteners

The bolt holds the pipe secure, not merely by thread tension, but clamps the pipe to the head by wedging the patterned washers against the pipe while the washers are, in turn, wedged between the pipe and the "E" clip locks fitted to the bolt heads.
